MAGONAREZ PF-035-AC

DESCRIPTION	MAGONAREZ PF-035-AC is a pure, surfactant- and oligomerfree selfcrosslinking (meta)acrylic copolymer in water.
--------------------	--

APPLICATION	MAGONAREZ PF-035-AC is an acrylic, selfcrosslinking binder for high performance interior and exterior wood applications, with good leveling properties, transparency and block resistance. MAGONAREZ PF-035-AC exhibits fast early-waterresistance , excellent chemicalresistance and good hardness/flexibility ratio.
--------------------	--

PHYSICAL DATA	Appearance : Clear, translucent white. Solids by weight : 40 (± 1%) pH value : 8,00 (+/- 0,5 %) Viscosity, 23 °C : < 500 mPa.s (Brookfield DV-E, Spindle 2/50rpm)
----------------------	---

TYPICAL DATA	MFT : approx 5 ° C Tg theoretically calc. : N-A Density : approx 1060 kg/m ³
---------------------	---

STORAGE	MAGONAREZ PF-035-AC should be stored in a closed container at a dry place at storage temperatures between 5°C and 30°C.
----------------	---

STABILITY	Under the above mentioned condition the storage stability will be 6 months ex works.
------------------	--
